

AT468

Rotary Scan-Pack Handler for Leaded & Leadless Packages

AT468 uses STI's proprietary vision technologies to provide ONE Vision Solution for all package types. The architecture provides customers with a powerful one-stop strategy, facilitating standardisation of quality assurance inspection techniques.

Features:

- Wide Range of I/O Configurations
- Inspects Lead, Leadless & LGA Packages
- High Performance 4-side inspection
Offers True 3D Measurement
- Post Seal Quality Inspection
- Powerful Auto-teach Algorithm
- Inspects Flexible Pad
- Micro Crack Detection
- 2D Matrix & OCR Capable
- Sub-pixel Defect Detection & Measurement
- Lead Burr Inspection
